

# Stepwise Guide To

## Cut Your Baby's Hair

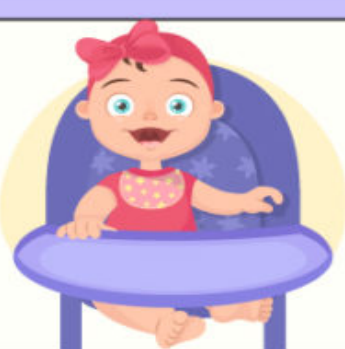

### With Scissors

1 Gather all the required tools in one place.

2 Ensure the baby is in a good mood.

3 Put the baby in a high chair and tie a cloth around their neck.

4 Play some music to entertain the baby.

5 Start slowly by spraying water to dampen the hair.

6 Move to brush their hair and start snipping little sections gently.

7 Check how the baby reacts; if fine, continue cutting.

8 Once done, wipe off the hair stuck around the neck and shoulders.
